DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 5, are drawn to audience survey, classified in class 455, subclass 2.01.
 - II. Claims 6 – 11 are drawn to transmitters and receivers having diverse art, classified in class 455, sub-class 66.1.
 - III. Claims 12 – 24 are drawn to position based personal services, classified in class 455, sub-class 456.3.
 - IV. Claims 25 – 60 are drawn to space satellites, classified in class 455, sub-class 12.1.
 - V. Claims 51 – 61 are drawn to receivers for satellite broadcast, classified in class 455, sub-class 3.02.
2. Inventions I, II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to audience survey, un-locking an automobile with a transceiver, location specific applications, and satellite radio/audio, respectively.
3. Inventions IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 2684

claimed because any telematics interface could have been used to achieve the functions described and not necessarily the specific interface claimed. The subcombination has separate utility such as a telematics interface utilized with systems commonly available or known and not specific to system claimed.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. John C Freeman (Registration No. 34,483) on 29 May 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
